

HOW TO SELECT A TYRE

Tyre size and maximum speed of the vehicle.
The maximum load capacity per axle (Load index).
Your style driving and road condition.

MOUNTING & DISMOUNTING

Only get trained people mounting and dismounting your tyres.

TYRE PRESSURE

For safe drive, it is extremely important to drive with the right pressure.

CHECK FOLLOWING ITEMS IN REGULAR WAY

Tread pattern
Unusual wear, tread groove separation, bulges.. etc.

Sidewall
Impact, Bulges, Ozone cracking, vehicle contact damage etc.

Pressure
The inflated pressure will be changed during long driving and changed circumstances temperature.

BRAND INTRODUCTION

- Design engineering originated from Europe, using the most up to date design technology available.
- All type of certificates are available, such as ISO16949, DOT, ECE, GCC, SASO, Soncap and Smartway etc.
- Exclusive Distribution available to offer.
- Direct factory programme , ensuring continuity of supply and competitive price.
- Full marketing support available.

DR109

- Steel and trailer wheel , for on-road condition;
- Suitable for middle and long distance application on the good road surface;
- Specially designed grooves bottom can effectively prevent gravels from being stuck in the bottom;
- Low rolling resistance formula of design can effectively decrease fuel consumption.

DR120

- Steer and trailer wheel, for on- road application;
- Unique tread pattern design minimizes side sliding on wet road surface;
- Wide and flat tread area offers smooth wear;
- Wear-resistance compaound design offers logn service life.

DR310

- Trailer wheel, for longhaul and regional using;
- Suitable for the middle and short distance application on the general pavement road;
- Excellent anti-side sliping performance and the running stability;
- Excellent wear resistance and longer mileage.

DR308

- All-wheel position of wheel, for on/off road condition;
- Suitable for middle and short distance application on the relatively poor road;
- With the good traction and stability of various road condition;
- Good puncture resistance and mileage effectively.

DR302

- All position wheel, for long distance and national transportation service;
- Unique tread pattern design minimizes side sliding on wet road surface;
- Wide and flat tread area offers smooth wear;
- Wear-resistance compound design offers long service life.

DR303

- All wheel position, for regional road using;
- Suitable for middle and short distance application on the general pavement road surface;
- Excellent water evacuation and wet traction;
- Low heat generating and the excellent wear resistance performance.

DR316

- All-wheel position, for regional using;
- Suitable for medium and logn distance application on the general paved road;
- The excellent high speed driving stability;
- The good wet skid resistance and low noise;
- The super wear resistance performance.

DR321

- All-wheel positon, for Regional using;
- Suitable for medium and long distance application on the general pavement road;
- The good drainage and handing stability;
- The superior adhesion properties and wet skid resistance performance;
- With the stronger loading performance;

DR528

- Drive wheel, for on/off road using;
- Suitable for mixed road and relatively poor road condition;
- Great grip abiltiy and excellent traction character;
- Excellent loading capacity and anti-puncture performance.

DR536

- Driver wheel, for on-road condition;
- Suitable for the medium and long distance on the paved road surface;
- Stable handling performance and powerful driving force due to design of intersecting grooves and block patterns;
- Much higher mileage due to low heat generating and soundly wear resistant formula.

- All position of wheel and for off-road condition;
- Suitable for the short distance application on the severe road;
- Excellent tractive and braking capability due to the large pattern block and transverse pattern groove;
- Good self-cleaning capability, strongly resistance to wear and puncture.
